- ①スマホにダウンロードしてある[Google Authenticator]もしくは[Authy]を立ち上げます。
- ②Step2にあるQRコードを読み込みます。
- ③[Google Authenticator]で読み込んだ数字をStep3に記入して[Secure my account]をクリックします。
- ④[Alternative manual-entry key]を忘れない様に保存します。(スマホが壊れた時に必要になります。)

The screenshot shows the 'Secure Your Account' page on the Cryptopia website. The page is titled 'Secure Your Account' and explains that the user's account is not using the strongest security. It offers two-factor authentication (2FA) to secure multiple features. A list of features with weak or no secondary security is shown: Security Settings, Login, Lockout, Withdraw, Transfer, and Tip. A note states that features in orange are secured by email 2FA. The page strongly recommends upgrading to a more secure 2FA method using an Authenticator app like Authy or Google Authenticator.

**Step 1: Download an authenticator app**  
Download and install Authy or Google Authenticator for your phone or tablet.

**Step 2: Scan the QR code on the left**  
Open the authenticator app and scan the image on the left, using your phone's camera.

Alternative manual-entry key:  
[Redacted input field]

**Step 3: Verify your setup**  
Enter the 6-digit code generated by the authentication app.

The screenshot displays the Cryptopia user interface. At the top, there is a navigation bar with links for Exchange, Promotions, Coin Listings, Coin Info, Services, and News. The user's profile is visible in the top right corner. The main content area is titled "Two-Factor Authentication (2FA)" and includes a sub-header "The following features can be secured by 2FA." Below this, there are six cards representing different features: Security Settings, Login, Lockout, Withdraw, Transfer, and Tip. Each card shows the type of authenticator app used (Authenticator app) and a "Remove 2FA" button. Below the 2FA section, there is a section titled "Account Security" which is divided into three sub-sections: Withdraw Settings, Api Settings, and Change Password. The Withdraw Settings section includes checkboxes for "Address Book Withdraw Only" and "Disable Withdraw Email Confirmation". The Api Settings section includes checkboxes for "Enable API", "Enable Withdrawal", and "Allow unsafe withdraw (Not recommended)", along with fields for "Api Key" and "Api Secret" and a "New Key" button. The Change Password section includes fields for "Password", "New", and "Confirm", and a "Change Password" button. A "Save Changes" button is located at the bottom of the Account Security section.
